

PULSE 600

CORSAIR

MARINE
INTERNATIONAL

The **PULSE 600** is full of Corsair DNA, modernized to meet the latest generation of trimaran sailors.

Featuring lightweight carbon reinforced construction, this boat will get your pulse racing in even the lightest of winds. The Pulse 600 is a sports boat that is about pure fun... Designed for conveniently easy rigging and setup so you can quickly launch, unfold the floats and get out on the water. With modern reverse bows and high volume floats, even the most performance oriented sailors have plenty to get hooked on with our latest addition to the Corsair range.

The open cockpit is designed for a crew of up to four but can equally be sailed single or double handedly. Versatility is a key feature of the boat and the forward area provides enough storage and cover for day sailing / weekend adventures or can simply be left empty for go-fast racing. Family, crew mates or friends, it doesn't matter with whom you sail, unfold your freedom on a Pulse 600.

PULSE 600
BY CORSAIR MARINE

Innovative design, full of features and true to the Corsair values we have throughout our range: **VERSATILITY, FUN & PERFORMANCE**

“The Pulse 600 is all about fun, versatility and simplicity. We designed a fast and well balanced sailing trimaran that can carry the family with comfort and protection, thanks to the roomy main hull, with water proof storage locker under the mast and the removable canopy, but can also be pushed hard and raced around the buoys.”

Designer Francois Perus

Floats can easily fold both on & off the water

20min Setup

Innovative carbon ring frame allowing maximum fwd access

Roller furling boom

Large online / sailing community with over 2000 Corsairs launched
